## EXPERIENCE

---

### UI UX Designer Intern

Sep 2025 – Mar 2026

*DB Klik*

*Surabaya, Indonesia*

- Built a Figma design system from scratch, comprising 18 components and 40 custom icons, reducing design time by up to 75% and delivered to the full team through developer handoff.
- Designed 545+ screens across 4 platforms (customer & admin website, business portal, HRIS, and omnichannel) as the sole UIX designer, from wireframe to interactive prototype.
- Reviewed and provided feedback on system analyst flowcharts, identifying edge cases and improving flow accuracy before UI design and developer handoff.
- Presented designs directly to stakeholders, iterated based on feedback, and consistently delivered across 4 concurrent projects on time.

### Web Developer Engineer Intern

Sep. 2024 – Dec. 2024

*Telkomsel*

*Surabaya, Indonesia*

- Built and shipped responsive web applications using React.js, ensuring cross-device compatibility and production-ready deliverables.
- Collaborated with an 8-person IT team and data team to ensure seamless feature development, system integration, and data-driven deliverables.
- Developed Power BI dashboards to monitor regional data, enabling data-driven decision making across teams.

### Full Stack Developer Intern

Mar. 2024 – Jul. 2024

*Dinas Komunikasi dan Informatika*

*Surabaya, Indonesia*

- Built and shipped a kanban-based internal project management application using Laravel and Tailwind CSS, delivered to production.
- Designed MySQL database schema from scratch, ensuring optimal data structure and performance for the application.
- Conducted initial application analysis including requirement gathering and feasibility study, contributing to project scoping before development.

## EDUCATION

---

### Airlangga University

Surabaya, Indonesia

*Bachelor's Degree in Informatics Engineering*

Sep. 2021 – Sep. 2025

GPA: 3.72/4.00

Coursework: UI/UX Design, Project Management, Web Development, Database, Software Testing, ERP

## PROJECTS

---

### JuicyBun | *Figma, HTML5, CSS3, JavaScript*

Jan 2024

- Designed end-to-end UI for a food ordering platform, covering user flow, visual hierarchy, and component layout.
- Delivered a fully functional design and prototype within one month, balancing speed and quality under tight timeline, resulting in an A grade evaluation.
